

**Amendments to Claims**

1. (currently amended) A dry melt flowable rotolining composition comprising particles of tetrafluoroethylene/perfluoro(ethyl vinyl ether) copolymer having an average particle size of about 100 to 3000  $\mu\text{m}$  and sphere factor of less than 1.5 and 0.2 to 2 wt% of adhesion promoting, non-bubble promoting metal powder, said composition having adhesion to steel characterized by a peel strength of at least 25 lb/in.
2. (canceled)
3. (canceled)
4. (original) The composition of claim 1 wherein said metal powder contains zinc.
5. (original) The composition of claim 1 wherein said metal powder contains tin.
6. (original) The composition of claim 1 wherein said metal powder contains copper.
7. (previously presented) The composition resulting from the composition of claim 1 after melting and then cooling of said copolymer, wherein said metal powder is dispersed in said copolymer.
8. (original) The composition of claim 1 wherein said copolymer is stabilized.
9. (canceled)
10. (canceled)
11. (canceled)
12. (canceled)
13. (canceled)
14. (new) The composition of claim 1 wherein the amount of said metal powder present is 0.3 to 1.2 wt%.

15. (new) The composition of claim 1 wherein said metal powder is zinc, tin or copper and is present in the amount of 0.5 wt%.
16. (new) The composition of claim 15 wherein said metal powder is zinc.
17. (new) The composition of claim 1 wherein said copolymer is unstabilized.
18. (new) The composition of claim 1 wherein said copolymer by itself does not adhere to said steel.
